

Specific data stories

This diabetes dashboard excludes patients aged under 25 years.

Story 1: Patient demographics

This data story shows the demographics of patients who were dispensed any glucose lowering medicines in the last 12 months

Diabetes patients	
Patient count	People dispensed a glucose lowering medicine in the last 12 months
Data source	Pharmaceutical Collection

Patients without diabetes	
Patient count	All people registered with a PHO excluding those dispensed glucose lowering medicines
Data source	PHO Enrolment Collection

When logged in: all other patients in the “your patients” tab	
Patient count	People who were dispensed any medicine prescribed by you in the last 12 months excluding those dispensed a glucose lowering medicine
Data source	Pharmaceutical Collection

Story 2: Current treatments

This data story shows which glucose lowering medicine(s) patients were dispensed in the last 12 months

Current treatments	
Numerator	Patients are counted in each medicine category if they have had that medicine dispensed in the last 12 months (patients can appear in multiple categories)
Denominator	Number of individual patients dispensed any glucose lowering medicine in the last 12 months
Data source	Pharmaceutical Collection

Comparator graph	
Numerator	Patients are counted in each medicine category if they have had that medicine dispensed in the last 12 months (patients can appear in multiple categories; comparator – national data or practice data)
Denominator	Number of individual patients dispensed any glucose lowering medicine in the last 12 months (comparator – national data or practice data)
Data source	Pharmaceutical Collection
Data displayed	The difference between the proportion of your patients on each medicine/category and the average proportion of patients in the equivalent category for your selected comparator

Story 3: Stepped treatments

This data story shows categories of 1, 2, 3+ medicines, and insulin, and the percentage of patients that were dispensed these.

Patients on stepped treatments	
Numerator	Patients are counted in a category if they were dispensed a glucose lowering medicine from three or more prescriptions in the last 12 months. The categories are: one medicine, two medicines, three or more medicines, and insulin with or without oral glucose lowering medicines.
Denominator	Total number of individual patients in the four categories.
Data source	Pharmaceutical Collection
